CORE	1st semester Students	ACTIVITY	특별활동3: 태권도	0002	ACTIVITY3 : TAEKWONDO	1	TUE 09:00 - 10:50	GYM	KIM SIYONG	13	Mandatory	This course is designed to enable students to easily adapt into the Korean way of life. Through the participation in various activities, we hope that students will gain a better insight and evoke an appreciation for Korean culture and traditions. The activities scheduled include; SAMULNORI Class where students will experience and enjoy learning to play Korean traditional instruments; TAEKWONDO Class which is considered a philosophy and is not an aggressive sport, will enable students to keep fit and simultaneously teach students virtues such as to always be peaceful and respectful to one another; and lastly MUSIC Class where students will not only be able to experience and enjoy Korean music but this class would also provide the opportunity for our students from diverse backgrounds to showcase their respective cultures and traditions through music.
	3rd semester Students	ACTIVITY	특별활동3: 음악	0001	ACTIVITY3 : MUSIC	1	WED 09:00 - 10:50	SYMPHONY HALL	HAN YONGHEE	53	Mandatory	
	3rd semester Students	CORE	한국경제의이해	0003	Understanding Korean Economy	3	MON 13:30 - 16:30	307	LEE BYEONGWAN	40		Development processes of Korean economy and the role of international trade and its policies are studied in order to advance the general understanding of Korean economy. In international context, various subjects such as globalization, economic divide among countries, foreign trading policy, and Free Trade Agreement, are investigated, and their influence on Korean economy and how to response to them are discussed. Other domestic issues, including development processes of Korean economy, relevant institutions, industrial structure, development strategy in different economic areas, and inter-regional economic structure and divide, are addressed. In addition, changes of international as well as domestic economic environment, and the current status of Korean economy are examined and further direction of development is explored.
	1st & 3rd Semester Students	CORE	한국의환경정책및관리	0004	Environmental Policy and Management in Korea	3	MON 13:30 - 16:30	402	LEE YOHAN	40	Madatory for KEITI Students	This course is designed for better understanding of global biodiversity crisis with regard to species conservation, ecological sustainability, and habitat fragmentation, based on the relevant fields such as biology, ecology, wildlife management, and environmental ethics and policy.
SAEMAUL UNDONG AND COMMUNITY DEVELOPMENT MAJOR	3rd Semester students	MAJOR	새마을지역개발세미나	0007	Seminar in Saemaul Undong and Community Development	3	WED 13:30 - 16:30	402	CHO WHANBOK	9		This course is designed to study general theories in SAEMAUL UNDONG; to analyse cases of practices in various areas; to examine problems and find out solutions in the cases through presentation and discussion; to share successful experiences; and to establish models of theories and practices in SAEMAUL UNDONG relevant to regional and national development. Moreover, Global SAEMAUL UNDONG cases around the world are presented and discussed to find out problems and alternatives, which make contribution to standardization and systemization of Global SAEMAUL UNDONG.
	3rd Semester students (Combined Class with IDC Major)	MAJOR	농촌개발론	0005	Rural Development	3	MON 09:00 - 11:50	402	LEE MISOOK	23		Rural areas need to develop differentiating strategy from urban and even other rural regions by developing and utilizing tangible as well as intangible resources and values in the rural area. This course includes studies on inheritance and development of regional traditional cultural resources; development of rural experience programmes from natural resources; and revitalization of regional economy. Therefore, successful direction of rural development is presented based on case analysis of rural development in advanced countries of agricultural industry. In order to make sustainable development of rural community whilst securing originality, the role of leaders to lead the development is vital. In this regard , education systems need to be established to train leaders who are able to lead regional development and redesign rural community relevant to modern circumstance.
	3rd Semester students	MAJOR	새마을운동현장학습3	0006	FIELD STUDY IN SAEMAUL UNDONG 3	1	-	-	LEE JEONGJU	9		This course provides students with an ample opportunity to take field trips to historic sites of SAEMAUL UNDONG movement. They are expected to observe the achievements of SAEMAUL UNDONG and other related data. The students will also have chances to talk with local residents who have participated in SAEMAUL UNDONG and have an interview with them. We will conduct pre- and post-field-trip sessions to prepare and feedback the results of the field trip in order to make the field study more effective.
	3rd Semester students	MAJOR	NGO와국제개발협력	0008	NGOs and International Development Cooperation	3	WED 13:00 - 16:00	307	HUH CHANGDEOG	14		Playing an increasingly more important role in all aspects of development, non-governmental organizations (NGOs) are key actors in international development cooperation and major partners of public development agencies. International development cooperation through NGOs can cover areas and objects that are not easily reachable by government-to-government cooperation framework. With this in mind, this course examines their functions, current spectrum of activities and management.

INTERNATIONAL DEVELOPMENT COOPERATION MAJOR	3rd Semester students (Combined Class with Saemaul Major)	MAJOR	농촌개발론	0005	Rural Development	3	MON 09:00 - 11:50	402	LEE MISOOK	23		Rural areas need to develop differentiating strategy from urban and even other rural regions by developing and utilizing tangible as well as intangible resources and values in the rural area. This course includes studies on inheritance and development of regional traditional cultural resources; development of rural experience programmes from natural resources; and revitalization of regional economy. Therefore, successful direction of rural development is presented based on case analysis of rural development in advanced countries of agricultural industry. In order to make sustainable development of rural community whilst securing originality, the role of leaders to lead the development is vital. In this regard , education systems need to be established to train leaders who are able to lead regional development and redesign rural community relevant to modern circumstance.
	3rd Semester students	MAJOR	국제개발협력현장학습3	0009	Field Study in International Development Cooperation 3	1	-	-	LEE MISOOK	14		This course aims to enhance the students' understanding of international development cooperation and improve practical field skills including English communication and leadership skills through an overseas field study opportunity. Students will also learn report writing techniques for their study plan essay and post-trip report. Evaluation of performance includes presentation of field study report.
PUBLIC POLICY AND LEADERSHIP MAJOR	3rd semester students	MAJOR	정책분석및평가	0012	Policy Analysis and Evaluation	3	WED 13:30 - 16:30	602	HWANG SUNGSOO	16		The goal of the course is to develop the conceptual foundations and practical techniques that enable students to become intelligent consumers and effective producers of public policy analysis (and policy evaluation). It will help studentsto define problems systematically, and to apply analytical tools in the service of better policy decisions. Students will also learn some practical tools in conducting policy analysis, and employ case studies to illustrate the concepts and techniques of policy analysis and debate.
	3rd Semester students	MAJOR	국제개발론	0011	Topics in International Development	3	TUE 13:30 - 16:30	502	LEE MISOOK	16		This course is designed to build a core understanding of the basic models used in international development as well as to expose students to the main themes of international development. Through an interdisciplinary array of courses in economic development, democracy, and international development cooperation, this class provides a broader understanding of the processes of economic, political, and social change and development in the developing countries. Also, current and controversial issues in international development and cooperation are selected for in-depth analysis.
	3rd Semester students	MAJOR	경 제개발현장학습3	0010	Field Study in Economic Development 3	1	-	-	LEE SANGHO	16		This course offers students an opportunity to visit field sites of economic development. Visiting sites include industrial complex, R&D centers, physical infra such as dams and expressways, and institutions involved in development policies. Students are required to submit a report regarding the sites they have visited.
FOREST RESOURCES AND ECOLOGICAL RESTORATION MAJOR	1st & 3rd Semester students	MAJOR	산림경제학	0013	Forest Economics	3	WED 13:30 - 16:30	502	LEE YOHAN	11		This course is taught to provide basic knowledge and theories on forest economics that concentrates on choices with respect to a particular limited resource, forests. This course supposes that students will study the tools of financial investment analysis. Students will apply the mathematics of investment analysis to evaluate alternative land management regimes. This course also provides information on how the wood products sector is structured. Student will study what factors affect consumer demand for wood-using goods, derived demand for wood as an input to the production of wood products, and supply of timber and wood products. In addition, this course deal with the role of forests in producing both market and nonmarket goods.
	1st & 3rd Semester students (Combined Class with Environment Major)	MAJOR	산림생태학	0014	Forest Ecology	3	TUE 13:30 - 16:30	602	SHIN JOONHWAN	27		This course is aimed at understanding the forest ecosystem which deals 1) the distribution of plan species in the forest, 2) interrelationship between plant individuals and environmental factors, 3) competition between plant individuals, 4) symbiotic relations and roles of woody species in the ecosystem, 5) various environmental factors which influence the forest, and 6) responding strategy of woody species to the environmental changes. Tree growth, competition between woody species or other organisms, interrelationship between woody species and environment, adaptation mechanism of trees to changes in environment, time and spaces, forest succession, and ecological forest management are also discussed.
	3rd Semester students	MAJOR	산림자원현장학습3	0015	Field Study in Forest Resources 3		-	-	LEE YOHAN	7		This topic deals with a broad understanding of relevant knowledges on forestry and ecological restoration through visits to government institutions, universities, research institutes, and factories which are relevant to the forestry sciences, as well as to sites of afforestation and ecological restoration.
	Mandatory for 1st semester KEITI students	MAJOR	환경관리및정책현장학습3	0017	FIELD STUDY IN ENVIRONMENTAL MANAGEMENT AND POLICY 3	1	-	-	SEO YONG WON	20		This course provides students with a chance to make visits to various places where they can have an understanding of the society's collective efforts to resolve the problems of environmental destruction.
